You are looking at a scanned in copy of an original print manual for an Apogee Software / 3D Realms game.

This manual is presented in its original format. Please note that any references to order forms or upgrade packs are no longer relevant.

Please also be aware that the old customer & tech support information presented here is out of date. Our phone numbers and hours of operation have changed or are possibly no longer relevant (depending on the title).

For current information, please visit our website.

Thank you.

Apogee Software Ltd / 3D Realms Tech Support
March 2009
http://www.3drealms.com
You are a member of the HUNT, the top secret High risk United Nations Taskforce, sent on extremely covert operations to possible trouble spots outside the three-mile boundary waters of member countries. You are on a routine reconnaissance mission on San Nicolas Island, located in the Pacific twenty miles west of Los Angeles. Your team is investigating possible cult activity in an old monastery, when suddenly troops pour out of nowhere!

In the distance your boat explodes. Just before your radio goes to static, you hear desperate newsmen describing the systematic destruction of Los Angeles.

An escaped prisoner informs you that a pyrotechnics expert and a rich movie studio head have joined forces with the Oscurido cult. Their plan: kill millions of innocent people for the glory of their master, El Oscuro. Having no other escape route, the HUNT heads into the monastery, taking the only course of action left: stop the Oscuridos or die trying.

PLEASE DON'T MAKE ILLEGAL COPIES OF THIS SOFTWARE
Rise of the Triad was produced through the efforts of many people. Everyone along the line relies on sales of the program for their living. Help preserve jobs by honoring the copyright of the program. Don’t make illegal copies for others who have not paid for the right to use the program.

This program is protected by federal and international copyright. To report copyright violations to the Software Publishers Association call 1-800-388-PIR8 or write:

Software Publishers Association
1730 M St. NW Suite 700
Washington, DC 20036-4510
Fax: 1-202-223-8756

SYSTEM REQUIREMENTS
Rise of the Triad (ROTT) requires an IBM® or 100% compatible 386 DX-40 or better computer with 4 Mb RAM (a 486 with 8 Mb and local bus video recommended), a VGA graphics card, and 20 Mb free space on a hard disk drive. Joystick, Cyberman™, Space Player™, mouse, and Gravis GamePad™ are optional. ROTT supports any of the following sound cards (or a 100% compatible): Sound BlasterPro/16™, AWE32™, AdLib™, WaveBlaster™, Roland Sound Canvas™, Gravis UltraSound™, Ensoniq SoundScape™, ProAudio Spectrum™, Logitech Soundman 16™, Disney/Tandy Sound Source™, and any General MIDI™ device. The use of a sound card is recommended.
FOR NETWORK PLAYERS: SITE LICENSING

When playing a multiplayer game (via network), each player must have a registered (legally purchased) copy of the game, unless everyone is playing the shareware version, which is free to “test drive” for 30 days.

Any player who is playing with an unregistered copy of Rise of the Triad (ROTT) is violating software copyright laws and should contact Apogee immediately to register the copy (copies) or purchase a site license (see next paragraph), or delete all ROTT files on the system and recording media.

Apogee provides two ways to play multiplayer network games legally: (1) Each player must have a registered copy of the game. (2) A site license must be purchased from Apogee which allows up to the maximum number of players to play a single network game on a single system at a time. Call 1-800-APOGEE 1 to order your site licenses.

A site license costs $89.95. (Sorry, there is no discount price if you’ve already purchased Rise of the Triad.) Here’s what you get if you buy a site license:

- A new CD-ROM copy of ROTT specially designed for network play.
- 10 Additional Comm-bat™ levels.
- Eleven command cards for quick reference.
- A signed lifetime Site License Agreement from Apogee for Rise of the Triad which gives you the right to play up to the maximum number of players per game, on a single networked system.

INSTALLATION

To play Rise of the Triad, you must first install the game. The program’s installation utility will place all of the necessary files on your hard drive. To install the game, follow these simple instructions.

1. Before installation, make backup copies of the original floppy disks and store them in a safe place. Use the backups to install.

2. Place Disk 1 (or the CD) into the appropriate disk (or CD) drive. Type the letter of the drive followed by a colon and press the ENTER key. Example: A::<ENTER>.

3. Type INSTALL and press the ENTER key.

4. Follow the instructions in the installation program.

5. After installation is complete, type SNDSETUP and press the ENTER key to configure your sound and music.

6. Once the sound setup is complete, type ROTT and press the ENTER key to play the game.

Note: With the CD-ROM version of ROTT, the game can be installed on the hard drive. However, in order to play the game the CD-ROM must be in your CD drive.

When starting, you will see a lovely introduction sequence. Once you have seen all you want to see, press a key. You will be whisked away in extreme comfort to the Main Menu. This is where everything starts to get interesting.
Navigating the Menus

Rise of the Triad (ROTT) has not been called one of the most user-friendly games ever for nothing. Complete control has finally been put into the hands of the gamer. Through ROTT's Main Menu, you can adjust almost anything in the game to fit your needs.

New Game

If you choose a new game, you will be asked which of the five characters you would like to be. Your choice will determine how many hit points you have, how fast you can run, and how accurate you are with certain weapons. (For more information, see the "Our Cast" section on page 15 and the "Starting a New Game" section on page 6.) After a brief intro, the game will begin.

Comm-Bat™ Game

If you have a modem, a network, or a serial cable, you can play ROTT against your friends! To choose this item, you must already have connected to your buddies by running the SETUP program from DOS. Whoever is the "MASTER" (the one who called, or the one who ran their program first) gets to choose the Battle Options. Each player gets to choose what character they would like to use in the Comm-bat™ Zones. (See more about this in the "Comm-Bat™" section on pages 18-19.)

Save Game

You can save your game anywhere in a level. If you haven't started a game, this option will be dimmed, and thus not selectable. Your saved game is stored with a picture of where you were, with the episode and area number that you were in. All you need to do is type a name or description of the game to be saved, and press the ENTER key.
RESTORE GAME
You can resume a previously saved game with this option. When restoring a game, you are shown a still shot of where you were when you saved that game.

ORDERING INFO
Find out about Apogee's easy game ordering information for *Rise of the Triad*.

OPTIONS
There are four selections here:

CONTROLS
You can choose what input devices you would like to use, and reconfigure them to what you prefer. There are three strange items here:

Adjust Threshold
This is how far you can move from center before the input device says, "Okay, let's move."

Mouse Sensitivity
You can move wildly or very little.

Customize Controls
Change what keys or buttons you use.

USER OPTIONS
This is an interesting section—under user options, you get to modify the game to suit your needs. You can change eight different things:

Auto Detail
If you want the game to automatically adjust the detail levels so the gameplay continues to run fast, choose this option.

Double-click Open
For the players of other 3-D games, we stuck in a double-click open. Use it if you’re used to it.

Light Diminishing
Is the game "just too dark"? Turn this off and all the areas will be brightly lit.

Bobbin'
If the gun bobbing makes you sick, turn this off. However, it won't stop shrooms mode.
Floor and Ceiling
If you are using a slower computer, you can choose not to draw the floors and ceilings; this will speed up the game.

Menu Flip Speed
Some people like to watch the menu flip, others just want to blaze to the next menu.

Detail Levels
Choosing a lower detail level will speed up the game if you’re on a slower computer.

Violence Level
Because of the growing concern with the amount of violence in games, Apogee once again leads the way with another industry first, a violence level adjustment option.

You can now control how much blood you see in the game, from None to Excessive. If you enter a password, everyone else will be locked out from changing the violence level. This is provided for the convenience of parents.

Note: You cannot change the violence level while in a game. You must end the game first.

MUSIC VOLUME/ SOUND FX VOLUME
These user options are used to adjust the volume levels of the music and sound effects.

VIEW SCORES/END GAME
If you are not currently in a game, this option allows you to view the current high scores. Otherwise, you’ll have the option to end your current game.

BACK TO DEMO/BACK TO GAME
If you’re not in a game, and you’d like to see the demo loop again, choose this. If you’re playing a game, you can return to it by choosing this option.

QUIT
Now that you’ve had your daily dose of death and destruction, use this option to quit back to boring reality.
STARTING A NEW GAME

After selecting New Game from the Main Menu, there are several options which must be chosen in order to start a new game. The first screen is the Select Player screen.

Select Player

In order to increase the playability and choices for the gamer, we designed ROTT with the option of five different characters to pick from. Each character has his/her own individually unique strengths and attributes. No two are exactly the same.

This is not a RPG, however, ROTT does allow you the ability to play as a character that has a personalized history and even an individual personality. Thus giving you, the gamer, an option to pick someone who represents you better than the ever-popular generic player.

Difficulty

Next, you must select the difficulty of the game. There are four skill levels to choose from. The different skill levels determine how quickly you are hurt, how many opponents are on a level, the skill levels, and how easy it is to see secret walls!

After these selections have been made, the loading screen will be displayed while your system prepares the level. Then the game, and your demise, will begin.

OBJECTIVE

With the boat gone and no means of escape, it's clear that this routine recon mission has suddenly taken a turn for the worse, and you now find yourself in a desperate situation. With no time to spare, and the balance of the free world resting in your hands, there is only one thing to do—blaze your way through the monastery. By seeking out and destroying this deranged cult, maybe you can save the world. And who knows, you might even live to talk about it. (We know this is cliched, but you folks don't care about story do you?)
THE GAME SCREEN

Information Bar (Top of Screen)
The Information Bar displays how many points you’ve earned, how long you’ve been in the current area you’re exploring, which keys you have, plus powerups and armor. On the right is a picture of your character, how many lives you have left, and how many life items you have collected. (When you’ve collected one hundred life items, you get a free life.)

Status Bar (Bottom of Screen)
On the Status Bar, we have two things: your health, which is displayed on the left; and pictured on the right is the ammo you have remaining for your current missile or magical weapon, with the infinity symbol displayed for bullet weapons.
ITEMS IN THE GAME
Simply walk over an item to collect it. Items in the game come in four categories: weapons, healing, dangers, and useful items.

WEAPONS
There are 11 different of weapons you can get in ROTT. Of these, there are three kinds: bullet weapons, missile weapons, and magic weapons. Let’s take a look at them, shall we?

BULLET WEAPONS
Pistol (Press “1” to activate.)
You don’t have to collect bullets in this game.
Ammo: Infinite

Dual Pistols (Press “2” to activate.)
Two guns at once. Double your pleasure, double your fun! This’ll “Woo” them to your side.
Ammo: Infinite

Machine Gun (Press “3” to activate.)
Once you have this, low guards are not a problem.
Ammo: Infinite

MISSILE WEAPONS (Press “4” to activate.)
Oh, man, do we have the missile weapons.

Missile weapons automatically upgrade. You can switch back to the bullet weapons by pressing INSERT (you may also customize this). You can carry only one missile weapon besides the three bullet weapons, and you can also drop your missile weapon by pressing the DELETE key.

Bazooka
Your basic straight shooting missile-firing weapon. Always a fun way to toast Triad terrorists terminally. Ammo: 10 Per Weapon

Firebomb
This explodes in a big X of fireblasts, shaking the very ground you walk on. Not for close quarters. Ammo: 5 Per Weapon
Heat-seeker
Will lock in on any heat source and head towards it. Handy for surgically picking off baddies.
Ammo: 7 Per Weapon

Drunk Missile
Five missiles fly out with no clue of where they are going. Ammo: 7 Per Weapon

Flamewall
As soon as this missile hits the ground, a wall of flame springs to life and burns enemies to cinders. Ammo: 5 Per Weapon

Split Missile
Hold down the fire button and two heat-seeking missiles fire. Let go, and they split off at 45 degree angles, plus the missiles both heat seek once split. Ammo: 7 Per Weapon

MAGIC WEAPONS
Two very powerful weapons exist in the game, borne of the magic of El Oscuro.

Excalibat
When one of the ancient staff-creating spells called for a length of wood, all the Oscurido minions could find was a baseball bat. Now it’s an enchanted baseball bat. You can bat around your enemies, which is pretty cool. But it has a secret power, if you can only unlock it.
Ammo: Infinite Swings and 10 Excaliblasts

Dark Staff
This is an incredibly powerful weapon. Little stops it, except thick walls. It destroys virtually everything in its path. A kinetic energy sphere, bristling with wild blue magic, shrieks toward your enemies. Ammo: 7 Per Weapon
HEALING ITEMS
Collect many different items for health. The amount of health you have is determined according to which character you select to play with.

Guard Gruel
10 Hit Points.

Priest Porridge
20 Hit Points (Cold) and 50 Hit Points (Hot).

Small monk crystal
10 Hit Points.

Large monk crystal
50 Hit Points.

Healing basin
Random number of Health Points (at least 25; up to 100).

LIFE ITEMS
Collect 100 life items, and you get a free life. Life items come in denominations of one, five, ten, and twenty five. Collect them all!

1Up
This gives you another life, or another death, depending on if you’re an optimist or pessimist. However, if your health is less than 75%, this will not give you a life, but will give you full health.

3Up
This gives you three lives. However, if your health is less than 75%, this will only give you two lives and full health.
DANGEROUS ITEMS
The environment in ROTT is not static. You will encounter many things to turn and run from!

Rolling Boulders
You got the idea, Pancake Boy!

Crushing Cylinders
If you are between one of these and a hard flat surface, well, let’s put it this way—you’ll have to untie your shoe to see the enemy.

Gun Emplacements
There are two kinds of gun emplacements. One kind senses when you are near, then rises and shoots at you. The other kind shoots in four directions as soon as you’re near.

Firechutes
These launch fireballs across the room, which tend to interfere with one’s traversal from one side to the other.

Firejets
Whether on the floor or ceiling, these guys blast a jet of fire into the air. To anyone standing by them, it ain’t the humidity, it’s the heat. Some firejets also move on tracks.

Gas Grates
Activated by a switch or a touchplate, these grates spew out poisonous green gas for an uncomfortable length of time. You cough, you lose health, and so on—unless you had the forethought to pick up a nice gas mask along the way.

Heat Pits
Filled with fiery lava, these really hurt to walk over. Anyone with sense wouldn’t walk over them, but then anyone with sense wouldn’t have tangled with a bizarre blood cult, now would they?

Pit Traps
They look like the floor, but walk over them and crack-blump, you have less health than you did.
Spinblades
Big, solid, spinning, covered with razor-sharp blades. Need we say, "don't run into them?"

Stabbers
Big circular racks of sharp spears, whirling out of the floor or ceiling. Note the little chunks of red matter on them. Beware!

Spinblade Stabbers
Okay, you've read the previous two. Combine them. 'Nuf said.

Moving Walls
As if the shooting guards weren't enough, there are WanderWalls that are out to get you.

Firewalls
They might look nice, but we would not advise leaning on them. Firewalls are as the name implies: they are hot, they often can move, and if you make contact, they will fry you like a chicken.

USEFUL ITEMS
There are some useful items in the lair of the Triad.

Bonus Barrels/Crates
Who knows what they contain? Healing, weapons, life items? Blow 'em up and take their contents. Crates are full of TNT; they explode and hurt enemies near them.

Pushpillars
You can push some pillars out of the way, by pressing the SPACEBAR. Or in the way, if you want. Some can only be pushed in one direction. Real puzzle-building stuff.

Gravitational Anomaly Disks
Gravitational Anomaly Disks are massively useful, and they're everywhere! You'll see them as elevators (EGADs), bridges, sky trains, stairs, ledges, and more. A combination of Darian's technical wizardry and El Osco's wizardly wizardry, they are quite helpful. Ride them, stand on 'em — disk-over all sorts of possibilities!
Keys
There are three regular keys: gold, silver, and iron. There are locked doors that they open, which have the same symbol as the key's ring. And there is a rare fourth key, the Oscuro Key. You never need an Oscuro Key to finish a level, but you can bet whatever it hides is very valuable.

Switches
Flip them, by pressing the SPACEBAR. They probably do something. If it's bad, well, at least you tried. Some switches are up on a pole, so you have to get up there somehow to flip them.

Jump pads
Jump pads are pneumatic launchers that chuck you up into the air. Some jump pads work only once, and some fire at intervals, so you have to stand on them and wait.

Touchplates
Some floors have secret touchplates installed in them. They appear as dark areas on the floor.

Elevators
They will shuttle you to some other place in the level. Press the SPACEBAR to activate.

ARMOR ITEMS
Three armor items help you out a lot. Get them whenever you see them. They are time limited.

Bulletproof Vest
Bullets do not hurt you when you wear this. However, missile weapons can still kill you.

Fireproof Vest
Made of asbestos and other itchy, fire-retardant materials, this vest helps protect you from fire and explosions. However, bullet weapons can still kill you.

Gas Mask
If you flip a switch or step on a touchplate and hear “Release the gas!”, I hope you have one of these. Otherwise, a lot of coughing, unstoppable tears, and agonizing green pain will ensue.
POWERUPS
There are six powerups. They significantly (but temporarily) change your abilities. How? Read on!

God Mode (30 Seconds)
Being eight feet tall, glowing, invulnerable, and able to disincorporate people and utterly destroy objects at your slightest whim has its advantages. [Editor's Note: this is not Jehovah, God, Allah, or any other god. This is a game. Get a grip.]

Dog Mode (30 Seconds)
Okay, two feet tall, furry, invulnerable, nasty bite, vicious bark. Trained well enough to open doors and go on the paper. Discover the secret BarkBlast!

Mercury Mode (30 Seconds)
Put on them crazy magic winged boots and run like the wind or fly into the air by pressing the Spacebar.

Elasto (15 Seconds)
Imagine you're a superhero who can turn into magical rubber and bounce off of anything. Okay, now imagine you're not invulnerable, and stuck in a bunch of narrow corridors with horrible environment dangers all around you. Not so tough now, huh?

Shrooms (15 Seconds)
Do not do shrooms. Your vision will wander sickeningly. The walls will start wiggling. Everyone will start glowing. Winners don't do shrooms. [Editor's Note: this is a powerdown in the game. It is not a real drug. It does bad things. If you're worried that little Johnny will want to try them, this will convince him never to do anything of the sort, it's that repulsive. And this is not reality. Once again, please get a grip.]

Random
Run into this and you never know what you'll get. For the desperate, or the thrill-seeking.

One note: To make things somewhat fair, you can still plummet to your awful death off any mountain if you're in God Mode or Dog Mode.
Our Cast: Heroes of the HUNT

Thi Barrett
Scottish. Thi (pronounced “tee”) is stout, but gorgeous. A toss of hair tends to fall over her forehead. Straight-laced. Medal in unarmed combat.

Taradino Cassatt
European Mix. Fit and powerful, Cassatt is the son of jetsetters who found a direction in life in the armed forces. Looks like a serious-minded beach bum.

Lorelei Ni

Doug Wendt
African-American. Impressive and large, Wendt wouldn’t win the 100-yard dash, but he can take hellacious damage. Tends to be insubordinate to book-following superiors. Lost last joint of right ring finger. Likes fighting with bullet weapons.

Ian Paul Freeley
AGE: 37 HAIR: Brown EYES: Green SKIN: Tan HT: 5'11” SPEED: Medium ACCURACY: Good HIT POINTS: High
Euro-Mediterranean Mix. Seen as a dangerous person, Freeley likes to release his aggression through the readily-available high-powered firearms. Frizzy brown hair seems to explode and fall to the side of his head. Greco-Spaniard by heritage. Not overly concerned with his appearance, Ian is swarthy but unkempt.
VILLAINS
A lot of people and things want to kill you, so perhaps you'd like to know who you're up against.

Episode One: APPROACH
Low Guard
The grunt of the Oscuridos forces: they shoot, and when it's time to "ask questions later," they shoot some more. (Male and Female)

High Guard
Armed with the old MP40 machine gun, these fellows enjoy perforating the enemy.

Overpatrol
Be careful around this enemy: they'll trap you in a net, then shoot you dead.

Boss
"General" Darian. The pyrotechnics wizard himself, now sporting the title of General, has plenty of tricks in store for you, including racks of stabbing spears, and a big bad bazooka!

Episode Two: MONASTERY
Lightning Guard
Trained for speedy maneuvers, watch out for lightning guards—they'll steal your stuff! Armed with a pistol. Once killed, you get your stuff back.

Strike Team
Tough and resourceful, these acrobatic guards won't stay still—they continually tumble out of the way of your attacks! (Male and Female in Triad Deluxe Edition)
Triad Enforcer
Big, bad, and wearing black, the Triad Enforcers wait on you with a big chain gun, then have the nerve to throw grenades at you! Jeez!

Boss
Sebastian "Doyle" Krist. Watch out for the former head of Triad Pictures—he's insane and heavily armed. He flies towards you in his battle throne, firing missiles and ramming you. Try and attack him! You'll see what happens!

Episode Three: CAVES BELOW

Patrol Robot
Forever patrolling the halls of the monastery; one sound and you'll have some high-speed visitors pummeling your chest!

Ballistikraft
Indestructible, double-attacking iron cylinders of death. Slow, but extremely deadly.

Boss
NME, the Nasty Metallic Enforcer. A huge robot guard constructed as the last guard of El Oscuro's Lair. Oh so deadly. (We even have trouble beating this guy.)

Episode Four: THE SLOW AND THE DEAD

Death Monk
These undead folks walk toward life sources and try to drain them of their energy. Tough to kill.

DeathFire Monk
These monks like their prey cooked before they feed, so they will blast you with fireballs.

Boss: El Oscuro, the Dark
The dark ancient force worshiped by the Oscuridos. With many magic attacks and awful surprises, you'll be dead twice before you notice your body is vaporized.
COMM-BAT™
In *Rise of the Triad*, you can play games over your modem, network, or serial cable. For advanced features of Comm-bat™ setup and play, please run the ROTTHELP.EXE program.

**Starting Serial Play**
For serial play, connect your computers. Run SETUP. Choose the correct serial port and run a serial game.

**Starting Modem Play**
Run SETUP. Choose Modem Game. Choose Change Modem Setup. Select your modem, type, and its setup.

Choose Manual Dial and enter your friend’s number. If you have entered that number in the Number List and set it to Default, you can simply choose QuickDial Default Number. Once connected, you can follow the MASTER OF CEREMONIES text in the Starting Network Play section.

**Starting Network Play**
While future versions may have player/servers, ROTT requires a separate computer to act as the server for all the players. This is so no one is slowed down by the server functions (making the game unfair), and also so no computer is required to have 16 Mb of memory (which it would need if it kept track of the data for 11 players and the game.)

**Starting The Server**
Run SETUP. Choose Network Game. Select the Launch as Server option, now choose the number of players that want to play and press Enter.

**Starting The Clients (Players)**
Run SETUP. Choose Network Game. Choose Launch As Client. Once the server finds all the people (and it will ridicule the people who are slow to enter), you can press a key and the game will start.

**Master of Ceremonies**
Whoever launched first will now be the “Master”. Once everyone has selected a player and uniform color, the Master gets to choose the Comm-bat™ level, options, then Play Game, or Play Team Game. You can play a game to completion or the Master can press ESC and then “Y” to quit, and that game will end. Any other players can simply leave the game at any time by pressing ESC and then “Y”.
In the game, press TAB to see everyone’s “KillCounts.” The list is actively sorted. (Except in Hunter—the person being hunted will be displayed in the upper left hand corner, so you know who you are looking for!)

**REMOTE RIDICULE™**

If you have a microphone hooked up to your SoundBlaster, make sure it is set up, then hold F12 and speak in the microphone. What you say will be heard on everyone else’s computer! Otherwise, press F1-F10 to play the preset sounds.

**Messages**

To type a message to everyone, press “T”. You can send directed messages by pressing “Z”, entering the message, and pressing ENTER. A list of all the other players will appear on the screen. Press the number of the player you’d like to send the message to.

For message macros, press “T” or “Z” to choose everyone or directed, then F1-F10 to select your macro string.

These are the barest rudiments of getting Comm-bat™ running. Please run the ROTTHELP.EXE program for a more detailed explanation.

**THE GAME SCREEN (NETWORK)**

On the status bars for Comm-bat™, we have five things: On the top left, the KillCounts leader is pictured with code name and current score; in the center, time and powerups; pictured on the right is your mug with your code name and current KillCount. On the bottom status bar in Comm-bat™ mode, all players are pictured with code names and each individual’s current score.
HINTS (Read at your own risk)
If you're having trouble and don't mind having surprises spoiled, here's the section for you. The following are little tips that once you know them, getting through *Rise of the Triad* becomes a lot easier.

- To pick something up, jump on a jump pad, or activate a touchplate, just run over it.
- Bosses can't be hurt by bullet weapons—only missile weapons.
- On easier difficulty levels, pushwalls are visible as slightly darker walls.
- You can see touchplates on the floor fading in and out.
- If you are having an extremely hard time locating touchplates, try turning the floors and ceilings off.
- The first boss, General Darian, can't stab you if you're standing under a light. There is a way to stop him stabbing. After that, if you can cover most of his escape routes, you can finally fight him on even ground. You may need to get into his room to finish your task first.
- You can heat up the Priest Porridge by firing a missile weapon near it, causing an explosion, and thus making it more helpful.
- Panes of glass break when shot. What if you run through them?
- Find the statue with the knife. You will need it when the Overpatrol guards throw their nets on you.
- If you cannot find the knife, try shaking or moving from side to side in order to dislodge the net.
- If you're in trouble, save often. (You'll be in trouble a lot, believe me.)
- To finish a level, you either have to exit through the exit arch, or kill the boss.

- There are several secret objects throughout the game. Pick these up for big bonuses.
- There are some secret levels which you have to go through a secret arch to get to.
- You can walk on top of pillars, spinblades, and fences.
- All gas switches have a gas mask hidden somewhere in the area.
- You can save missile ammo by luring guards into the line of firechutes or WanderWalls.
- BE CAREFUL with the Firebomb in close areas.
- Bonus Barrels have a gray Triad plaque on them. Normal barrels have a blue one.
- If you aren't in No Violence mode, you can distinguish Sneaky Guards from regular guards, because they don't have blood on them.
- Some pushwalls are hidden behind things you can destroy, and some are only pushable from up on platforms.
- On the first level of Dark War, there is a touchplate to the right before the first door. It opens room with health and an MP40 in it.
SPECIAL FEATURES

Jump Pads
One of the many unique things in ROTT are the jump pads. These pneumatic launchers are a key element in clearing almost every level. If there is a jump pad in the area, rest assured that it was placed there for a reason.

The Oscurido cult has used its evil magic to suspend objects in the air such as weapons, powerups, health items, and Gravitational Anomaly Disks—to name a few. Often jump pads are placed near items that are in the air.

Statue With Knife
The knife is a very useful item when facing the Overpatrol guards. When making your way through the monastery, you will locate the golden statue with the knife. Walk up to it and remove the knife. When a net is thrown on you, the knife will automatically appear. Press Fire to use it. (You cannot use the knife to cut anything other than the net.)

Aiming Up and Down
Combining aiming a weapon with the added feature of looking up and down creates a deadly combination. By pressing the HOME key to look up and the END key to look down, the gaming possibilities are now endless. (Press the PgUp or the PgDn keys to automatically recenter.)

Imagine walking along a catwalk, sixty feet up, and aiming a heatseeker down at your enemy... Or how about lobbing a flamewall over a wall into a room of unsuspecting guards? These are just a few of the things that can happen in ROTT.

Automap
To help with your bearings in ROTT, the game is equipped with an Automap. Press the TAB key to activate a top down map of everything you’ve seen to date. PgUp and PgDn will zoom in and out of the map, in the current level.
# Controlling the Action

You can play *Rise of the Triad* by using a joystick, gamepad, mouse, Cyberman™, Spaceball™, or the keyboard. The following outlines the player input actions and the functions they control:

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up Arrow</td>

### Combat™ Options

- **F1-F10**: RemoteRidicule™ using the preset sounds
- **F12**: Hold down and speak through your microphone
- **T**: Type a message to everyone
- **Z**: Send a direct message to a certain person
- **Tab**: See everyone’s KillCounts
### CHEAT CODES

Are you having a little trouble? Hey, we designed the levels and wrote the code; we know how hard ROTT is. However, we are not totally sadistic; we have hearts. *We're not monsters, for God's sake!*

Well, before you find yourself out shopping for a new keyboard due to frustration, take a moment and reflect on the reason you’re playing a game in the first place, *to escape reality and to relax.*

Okay, if you find yourself being challenged, and feel the strong need to cheat, type “BUM” to receive a few hit points and a few keys. Those who like typing can type “SLACKER” for the same effect. There are many more secret cheat codes. Can you find them?

THE REAL STORY

You are a member of the HUNT, the top secret High-risk United Nations Taskforce, sent on extremely covert operations to possible trouble spots outside the three-mile boundary waters of member countries. You are on a routine reconnaissance mission on San Nicolas Island, located in the Pacific twenty miles west of Los Angeles. Your team is investigating possible cult activity in an old monastery in the tall, rugged hills of the island, once used for the location of the film *Prayers in the Dark*. Dressed in black, you peer at the ramps, looking for signs of life.

Ni spotted a man crawling away from the small mountain the monastery rests on. He ran desperately towards the team and fell to his knees.

"They're crazy," said the man hurriedly, "They don't know what they're mess ing with. Darian, Krist—they've hooked up with those wackos, and they have these impossible plans but they're really serious. They're manufacturing ammo. They're performing these rituals. They've planted bombs everywhere. Some of them are already scheduled to go off. They're not going to warn anyone, they're just going to—"

"Barrett, I've been listening to the radio," Wendt said. "Bombs have gone off in the shipyards. The harbor's in flames. There's been explosions of major downtown buildings. And—damn it. Heavy static. The radio's being jammed."

"They have a mobile band jamming system," said the man. "They're signalling the bombs on their private, moving band while jamming all the others."

Barrett grimaced at the bizarrely informative guy, then turned to the team. "All right, Cassatt, Wendt, get back to the boat, try the WB radio, and get to—"

A volley of gunfire hit the rocks next to them, and the HUNT opened fire on the two sentinels that spotted them. The HUNT ran to the sentinel's post at the top of the hill.

Freeley kicked over the dead soldier. "What's with the uniforms? These are, what, Korea? And the triangle, that looks like the logo of Triad Pic—"

A huge explosion came from the island shore. The HUNT looked up to see their boat raining down upon the ocean. A dozen or so soldiers were making their way up the rocky path towards them.

"Looks like we missed our ride," Barrett said, taking a breath. "Okay, they know we're here. The only way out is the way we came, and they're coming from that way. No way to contact anyone, and we're the only ones who know what's going on. It's my call. Let's go for the keep. If we can get to their transmitter, we've got a chance at stopping it. And maybe we can take down the big boys while we're at it."
If you didn’t buy the CD version, you can upgrade by buying the

“Triad PowerPack™”

There are two editions of Rise of the Triad:

1. Diskette based, standard edition. (You’ll benefit from upgrading.)
2. CD-ROM based, “Super Triad”. (You do not need to upgrade!)

If you purchased the diskette based version, then you may want to purchase the Triad PowerPack™, which adds these explosive extras:

- 10 new, exciting Comm-bat™ levels, excellent for head-to-head 11 player network, modem play, or serial cable!
- A random level generator (“RandROTT”), which creates an unlimited number of new Comm-bat™ levels, as well as an unlimited number of new, action-packed game levels for single player games.
- For Windows users: You’ll get several cool sound effects from ROTT that can be used as Windows system sounds, plus you’ll get several images from ROTT specially formatted for use as Windows wallpaper. Note: The CD-ROM version contains many more sounds and images than the floppy version.
- With the CD-ROM version only, we will include five of Apogee’s latest action packed shareware releases.

All this for a $10 upgrade price! (ordering details below).

Important: This upgrade offer is only for players who have purchased the basic diskette based edition of Rise of the Triad. If you already have the CD-ROM version then this upgrade offer is not for you, since you already have it all.

Here’s how to order the remaining action-packed levels and Comm-bat™ zones for the hottest game of the year:

1. Complete the order form on the reverse side of this page, tear at the perforation and fold.
2. Include your payment in the amount of $10.00 plus shipping and handling and tax (if applicable).
3. Send this original order form (copies not accepted) and payment to the address below:

   Apogee Software, Ltd.
   Triad PowerPack™
   P.O. Box 496389
   Garland, TX 75049-6389

Sorry, phone and fax orders for this upgrade offer cannot be accepted.
Yes, I want to continue the bloodbath; please send me the Triad PowerPack offer today!

DO YOU REQUIRE FURTHER TECHNICAL ASSISTANCE?

As a registered user of *Rise of the Triad*, you are welcome to contact our Technical Support and Hints Department for any assistance required. Technical support and hints may be received by calling (214) 278-5655, Monday through Friday, between 8:00 a.m. and 6:00 p.m., Central Standard Time. Or fax us at (214) 278-4670, 24 hours a day. If you prefer to write, send correspondence to:

Apogee Software, Ltd.
Technical Support / Game Hints Department
P.O. Box 496389
Garland, TX 75049-6389

To assist us in providing you with faster service, please have your registration number ready and be at your computer system when you make the call. Written inquires should include your registration number, system type and accessories, and printed copies of your CONFIG.SYS and AUTOEXEC.BAT files.

Please do not call the 800 number for technical support or game hints, as this information will not be provided on this line.

There is a file included with the *Rise of the Triad* game disks which contains detailed technical support information. This file is named ROTHELP.EXE. If you are having difficulty running *Rise of the Triad* once it has been installed, please consult this file before you call Apogee. The file contains solutions to the most commonly encountered problems of our customers and the latest up-to-the-minute information that might have been updated since the manual was printed.

THANKS FROM APOGEE!

All of us at Apogee would like to express our sincere appreciation for your purchase of this software package. Much time and effort goes into the development of our software, and your support ensures that we can continue to offer quality software entertainment.

APOGEE SOFTWARE

Apogee Software, Ltd. is the publisher of *Rise of the Triad*, and many other cool VGA action games for IBM™ and compatibles. For information about all the products available from Apogee call 1-800-APOGEE 1—and ask for a full color catalog.

Limited 90-Day Warranty

Apogee Software, Ltd. warrants to the original purchaser of this computer software product that the magnetic media (Disks) or Compact Disc (CD) on which the software program is recorded will be free from defects in material and workmanship under normal use for ninety (90) days from the date of purchase. This warranty is limited to the Disks or CD containing the software program originally provided by Apogee Software, Ltd. This warranty shall not be applicable and shall be void if the defect has arisen through abuse, mistreatment, or neglect. Any implied warranties applicable to this product are limited to the 90-day period.

To be eligible for warranty protection, the original purchaser must fully complete and mail the Registration Card to Apogee within thirty (30) days of purchase (If the product was purchased directly from Apogee through mail order, the product was automatically registered). Failure to send in a completed Registration Card will result in the loss of your warranty protection. Apogee reserves the exclusive right to determine warranty eligibility.

If the Disks or CD is found defective within ninety (90) days of original purchase, Apogee will replace the item(s) free of charge. After the warranty period, replacement disks will be issued for a nominal fee.

EXCEPT AS SET FORTH ABOVE, THE PRODUCT IS PROVIDED "AS-IS", AND NO WARRANTIES OF ANY KIND (INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), EXPRESS OR IMPLIED, ARE MADE AS TO IT OR ANY MEDIUM IT MAY BE ON. OUR ENTIRE LIABILITY AND YOUR EXCLUSIVE REMEDY IS SUCH REPLACEMENT, AND UNDER NO CIRCUMSTANCES WILL WE PROVIDE ANY OTHER REMEDY FOR DIRECT, INDIRECT, SPECIAL, CONSEQUENTIAL, PUNITIVE, INCIDENTAL OR OTHER DAMAGES ARISING FROM IT, INCLUDING SUCH FROM NEGLIGENCE, STRICT LIABILITY, OR BREACH OF WARRANTY OR CONTRACT, EVEN AFTER NOTICE OF THE POSSIBILITY OF SUCH DAMAGES. Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so this may not apply to buyers of the Program. This gives you specific legal rights, and you may also have other rights which vary from state to state.

To receive a replacement:
1. Contact Apogee’s Customer Support Department at (214) 278-5655 and request a Return Authorization Number (RA#). Customer Support may be reached between the hours of 8:00 a.m. and 6:00 p.m., Monday through Friday. Items without an RA# will be returned to the sender without consideration.

2. Package the original product media, a photocopy of your dated purchase receipt, and your name and address in protective packaging. If requesting a non-warranty replacement, also include a check or money order in the amount of $12.00 ($13.00 for Canada and Mexico; $15.00 for all other countries). Only funds which are payable in U.S. dollars and drawn against a U.S. bank will be accepted.

3. Clearly print the RA# on the outside of the packaging and return by certified mail or by other suitable means of postage prepaid shipping in which tracking is possible to: Triad Replacement, Apogee Software, Ltd., P.O. Box 496389, Garland, TX 75049.
THE DEVELOPERS OF INCREDIBLE POWER
Tom "Is My Eye Red?" Hall, Designer/Producer
Tom co-founded id Software, worked on Commander Keen, Wolfenstein 3-D, and DOOM, then came to Apogee to head up the in-house team. Tom is from New Berlin, Wisconsin, and got a B.S. in Computer Science at UW—Madison. Tom designed the game, and his iced tea must have "no lemon, no spoon."
Mark "Okay...Everybody SHOOT ME!" Dochtermann, Head Programmer
A native of Bedford, NY, Mark graduated from RIT while still having time to make a cheese-plate with animating LEDs on it. Mark did a co-op at crazy IBM™,©, then made the happy mistake of coming to work for Apogee. Mark did the amazing engine, network, and modern code.
William "Our Weapons are TOO Gone" Scarboro, Programmer
William went to Texas A&M, where he studied Computer Science, Math, and Smelly Comestibles 101. "Food is just fuel" to him, so he eats pasta, egg whites, and beans for almost every meal. He is working toward being a professional fitness instructor between complex actor coding sessions.
Jim "Wicked" Dose, Programmer
Our master of sound is also from New York (Binghamton to be exact), and thinks the game is "wicked cool!". He went to Berklee to study some sort of musical engineering deal, then to a whole other college to study computer science. He likes Eno, root beer, and The Tick, but not necessarily in that order.
Stephen "Mr. Explosion" Hornback, Artist
Steve hails from Ohio, where he left a sordid past. Having worked on Duke Nukem and Cosmo, he was hired as an in-house artist once the department started up. He drives a spiffy Nissan 300ZX, and did most of the actor art in the game.
Susan "Terrified of Left Turns" Singer, Artist
From New York, too (Levittown), Susan has worked on the opening of Pee Wee's Playhouse and the Fritos Round-up commercial. When not taking classes or teaching them, Susan relaxes by taking more classes. She did the walls and female characters.
Chuck "Chuck" Jones, Artist
Chuck Jones is not THAT Chuck Jones, but he is a gifted artist from Dallas. Chuck used to work in a tattoo parlor, and has a collage of the many bodies he's tattooed. Chuck did the "game over" cinematics and wide doors.
Former Developers of Incredible Power
These talented folks had to leave for various reasons. We'll miss 'em!
Nolan "Donut" Martin, Programmer. Did the menus, setup, sound setup.
Tim "Sony" Neveu, Artist. Did the killer weapons, intro, and end cinematics.
Associate Developers
Who did all these dang levels? Well, Tom and these folks:
Joseph "Building Climber" Selinske. Did many battle levels, ate sashimi.
Joe "D. Fish" Siegler. Did levels, petted his cat Flash, watched Red Dwarf.
Marianna "Harem Girl" Vayntrub. Worked on game levels, Krist's chair, Mark.
In-House Musician
Lee "Rainbow Lake" Jackson. Wrote the music, also a World Champion Pum-meister.
